

How can we improve the experience of healthcare professionals in patient care?

Fundación Huésped needed to enhance its electronic medical record system.

Adoption of the tool was hampered by functional and usability limitations that made it difficult to perform day-to-day tasks such as entering and retrieving clinical information.

OUR SOLUTION

- ✓ Enhanced visualization of clinical evolutions for every patient.
- ✓ Attachment management with **parameterizable** file types and size limits.
- ✓ Dynamic forms integrated into clinical evolutions, standardizing data entry.
- ✓ Full **change history & audit trail** for patients and evolutions.
- ✓ Proactive technical assessment and roadmap for the platform's.
